下面我们将"其他"这个块元素分成左右两栏

left-body(包含三个 square) 和 right-body（主要内容）　　看 pdf 红色框

我们暂定 left-body 占宽度的 30% right-body 占 70%

```
.wide_body_left{
    width: 30%;
}
.wide_body_right{
    width: 70%;
}
```

right-body 的内容又分为图片和 featured_work，在这里都设置都占满父元素

```
.theme-header-picture{
    width: 100%;
    height: 100%;
}
.featured_work{
    width: 100%;
    height: 100%;
}
```

left-body 内容如下：

```
<div class = "left wide_body_left borded "> square</div>
```

right-body 内容如下：

```
<div class = "right wide_body_right borded">
    <div class = "theme-header-picture borded"> theme-header-picture</div>
        <div class = "featured_work borded">
            featured_work
        <div>
    </div>
</div>
```

然后用 left-body 的内容和 right-body 的内容代替"其他"块

```
<div class = "body_content borded clear-both">
    <div class = "left wide_body_left borded "> square</div>

    <div class = "right wide_body_right borded">
            <div class = "theme-header-picture borded"> theme-header-picture</div>
                <div class = "featured_work borded">
                    featured_work
                <div>
            </div>
    </div>
</div>
```

运行 step3.html 最后结果如下
